

Sr No.	Unit No.	Question
1	1	Explain Data types in C
2	1	Explain Flowchart in detail along with its symbols.
3	1	Explain Algorithm in detail.
4	1	Explain Tokens and its categories in Details
5	1	Write an algorithm to find a factorial of a given number
6	1	Explain operators in details
7	1	Draw a flowchart to find out an addition up to N number. (N should be taken from user)
8	1	Draw a flowchart to find out whether given number is prime or not.
9	2	Explain an if-else statement
10	2	Explain an else if ladder in detail
11	2	Explain an switch case statement in detail
12	2	Explain an entry controlled loop in detail
13	2	Explain an exit controlled loop in detail
14	2	Explain a do... while loop in detail
15	2	Explain a while loop in detail
16	2	Explain a for loop in detail
17	2	Explain continue and break statement in detail
18	2	Explain Go-to statement in detail
19	3	Explain 1-D array in detail (along with initialization and declaration and access)
20	3	Explain 2-D array in detail (along with initialization and declaration and access)
21	3	Explain string.h library's function in detail (strlen(),strcpy(),strcat(),etc)
22	3	Explain pointer in detail.
23	3	Explain call by value and call by reference in detail
24	3	Explain array to a pointer in detail.
25	4	Explain function declaration, function definition and function call in detail.
26	4	Explain a different categories of function.
27	4	Explain recursion in detail.
28	4	Explain formal argument and actual argument in detail.
29	4	Explain the usage of function.
30	4	Explain different types of function in detail
31	5	Explain structure in detail
32	5	Explain Union in detail
33	5	Write down a difference between structure and union
34	5	Explain memory allocation and deallocation function in detail
35	5	Provide all memory allocation and deallocation function's syntax in detail
36	5	Explain file opening mode in detail
37	5	Explain functions used by Files
38	5	Explain fseek and ftell() in detail
